

Summary of Contributions

The table below is a breakdown of each contributor's activity based on git metrics.

Contributor	Commits	Lines Added	Lines Deleted	File Changes
Akash Sayanthan	13	11,067	2,051	77
Abijit Basra	8	3,231	22,882	48
Elias Afzalzada	7	25,429	5,065	52
Cameron Browning	3	308	142	3
Hamzah Baig Baig	3	1,232	0	2

Individual Breakdown:

Akash Sayanthan

Commits: 13

Key contributions:

- Setup the initial working application
- Reorganized a single-file component into a modular structure into lib/, components/, and hooks/.
- Built Rating & Review feature
- Built sorting and list modal features, Favourites, Watchlist, Wishlist
- Admin movies edit feature
- Created test suites and additional test cases initially and peer edited with Abijit.
- Wrote README, UserGuide, and co-wrote all 4 phases documentation with Abijit.
- Fixed bugs in MovieCatalog
- Consistent contributions across all project phases, features, testing, refactoring, and documentation. Clear primary driver of the project.

Abijit Basra

Commits: 8

Key contributions:

- Added MovieCatalogLogin component.
- Fixed broken package configuration.
- Two cleanup commits removing dead/duplicate code (Mar 19), accounts for the large deletion count.
- Updated Modal.jsx and MovieCatalog.jsx, Similar Movie feature and "You might also like" UI rendering.
- Assisted with Creating test suites and additional test cases through peer programming with Akash.
- Uploaded and co-wrote documentation for all 4 phases with Akash.
- Added run.sh / run.bat build and preview automation scripts.
- High deletion count (-22,882 lines), deliberate cleanup of accumulated dead code and duplicate files.
- Contributions span infrastructure, documentation, testing, and feature work.

Elias Afzalzada

Commits: 7

Key contributions:

- Initialized the React project scaffold via Create React App.
- Implemented authentication and role-based logic in MovieCatalog.jsx.
- Built Admin add/delete movie feature.
- Several revert/reapply commits on Mar 8 reflect merge conflict resolution, not duplicated work.
- The inflated line count is largely from project initialization.
- Contributions span auth/role logic and admin CRUD functionality.

Cameron Browning

Commits: 3

Key contributions:

- Integrated external API into MovieCatalog.jsx.
- Completed filtering fix.
- Refined MovieCatalog.jsx, UI and logic polish.

Hamzah Baig Baig

Commits: 3

Key contributions:

- Developed the login interface component, which was used as the basis for user authentication.
- Fixed filters.
- Add files via upload, includes MovieFilter.java.

Discrepancy Justifications

The following table addresses metrics that may have discrepancies.

Discrepancy	Justification
elias-afz has 25k+ lines added	Primarily from the 'Initialize project using Create React App' commits. This figure is inflated by Create React App output.
abijitbasra has -22k line deleted	Two cleanup commits removed large volumes of duplicate/stale files that was starting to get messy.
abijitbasra appears under two names	Same contributor (abijit.basra@ontariotechu.net) with inconsistent Git username, counted as one person (8 commits total). Login issue with personal and student VS Code.
