5. Bugs Found and Resolved

The following bugs were identified during testing and resolved before final submission

Bug #	Severity	Symptom	Root Cause	Fix Applied	Status
01	HIGH	Favourites not loading after login	handleAuthSuccess() never fetched favourites table	Added Supabase favourites fetch inside handleAuthSuccess()	FIXED
02	HIGH	Canadian spelling broke Supabase table names	sed replaced .from('favorites') with .from('favourites')	Reverted .from() calls to 'favorites'; kept UI variables in Canadian spelling	FIXED
03	MEDIUM	Remove from modal didn't deselect card button	Modals updated local state but didn't notify MovieCatalog Sets	Added onRemove callback prop; parent removes id from Set on call	FIXED
04	LOW	FavouritesModal import path error	Import used ./lib/ instead of ../lib/ from inside components/	Fixed path to ../lib/supabaseClient	FIXED
05	LOW	window is not defined in test teardown	setTimeout in useEffect fired after test environment torn down	Added vi.useFakeTimers + vi.runAllTimers() in afterEach across affected test files	FIXED
